Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's election with traverse of group II in the reply filed on 10/18/05 is acknowledged. The traversal is on the ground(s) that it is not a serious burden on the Examiner. This is not found persuasive because the applicant has not submitted any clear evidence as to the error of the restriction.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-9 and 18-36 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 10/18/05.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wheat in view of Hickey et al or Harwood.

Wheat discloses an aircraft having seating area with seats, a source of electrical power/data, bus strips at seating area, and connectors with retaining mechanism, but is silent on

Art Unit: 3644

the strips being accessible continuous receptacles. However, Harwood and Hickey et al teach that continuous receptacles to allow access to the bus strips at any location are well known.

It would have been obvious to have used continuous receptacles in Wheat's system as taught by Hickey et al or Harwood to allow the access of power/data at nearly all positions. Hickey et al or Harwood teaches receptacles with locking details. Elements such as grounds, current return, and current supply are well known in this day and age. Hickey or Harwood teaches retainers (see figures).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Smallhorn, Cawley, Lambiaso, and Chow discloses electrical systems.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tien Dinh whose telephone number is 571-272-6899. The examiner can normally be reached on 9-6.
